ANALYTIC SUBJECT INDEX

Barrier, quantum mechanical
– Quantum mechanical barrier problems. I. Coherence and tunnelling in asymmetric potentials - Dekker **146A** (1987) 375
– Quantum mechanical barrier problems. II. Dissipative tunnelling at finite temperatures for the unbiased oscillator - Dekker **146A** (1987) 387
– Quantum mechanical barrier problems. III. Dissipative tunnelling at finite temperatures for the weakly biased oscillator - Dekker **146A** (1987) 396
Bianchi type II universe
– Viscous—s with intergalactic magnetic field - Hageman and van Leeuwen **146A** (1987) 506
Bogoliubov-type solution (see *Multiple time scales method*) **146A** (1987) 175
Bogoliubov-type solution (see *Multiple time scales method*) **146A** (1987) 201
Boundary correlation functions
– —and interface formation in two-dimensional solids - Holz and Gong **146A** (1987) 255
Brownian particles, spherical
– Linear response theory of the viscosity of suspensions of spherical Brownian particles - Felderhof and Jones **146A** (1987) 417

Capillary fluctuations (see *Interface, liquid–vapour*) **146A** (1987) 622
Chapman–Enskog theory (see *Lennard-Jones fluid*) **146A** (1987) 341
Colloidal systems, charged
– Steady state viscosity coefficients of charged colloidal systems - Dhont **146A** (1987) 541
Convective diffusion
– Long-time tails and—with random traps - Schotland **146A** (1987) 295
Convective motion
– —and transfer of force by many-body hydrodynamic interaction - Felderhof and Jones **146A** (1987) 404
Cosmological constant, positive
– The effect of a positive cosmological constant in the early universe - Barrabès and van Leeuwen **146A** (1987) 308
Critical end point (see *Multicomponent fluid*) **146A** (1987) 634

Dephasing optical
– Thermo field dynamical approach to optical dephasing - Ban and Arimitsu **146A** (1987) 89
Diagrammatic theory
– —of spin excitations in an anisotropic ferromagnet with spin–phonon interactions - Chakraborty and Tucker **146A** (1987) 582
Diffusion to particles on substrate
– Diffusion to an assembly of slowly growing particles on a substrate - Bobbert et al. **146A** (1987) 69
Dislocations (see *Interface formation*) **146A** (1987) 255

Electrochemical reaction (see *Diffusion to particles on substrate*) **146A** (1987) 69

Electron plasma
– Kinetics of a two-dimensional classical— - Lu **146A** (1987) 525
Electron–phonon interaction (see *Thermo field dynamics*) **146A** (1987) 89
Erratum
– —to Physica 144A (1987) 453, Quantum coherence and tunnelling in a double-well potential in a thermal environment: dynamics of the weakly coupled spin–boson system - Dekker **146A** (1987) 662
Ethane–hydrocarbon mixtures (see *Multicomponent fluid*) **146A** (1987) 634
Excitations, elementary (see *Heisenberg systems, antiferromagnetic*) **146A** (1987) 151

Fast variables (see *Separation, fast–slow*) **146A** (1987) 219
Fast variables (see *Separation, slow–fast*) **146A** (1987) 242
Fermi systems, extended
– Van Kampen waves in extended Fermi systems and the random phase approximation - Nemes et al. **146A** (1987) 282
Ferromagnet, anisotropic
– Diagrammatic theory of spin excitations in an anisotropic ferromagnet with spin–phonon interactions - Chakraborty and Tucker **146A** (1987) 582
Fluctuation–dissipation theorem
– Volterra equation formalism for response theory - Yu **146A** (1987) 319
– The—for non-Markov processes and their contractions: The role of the stationarity condition - Medina-Noyola and del Rio-Correa **146A** (1987) 483
Fourier–Bessel function (see *Random walks*) **146A** (1987) 641
Friction tensor (see *Convective motion*) **146A** (1987) 404

Gravity effect (see *Interface, liquid–vapour*) **146A** (1987) 622
Green's function, transverse spin (see *Diagrammatic theory*) **146A** (1987) 582
Growth radius (see *Diffusion to particles on substrate*) **146A** (1987) 69

Harmonic ocsillators, coupled (see *Heisenberg systems, antiferromagnetic*) **146A** (1987) 151
Heisenberg systems, antiferromagnetic
– Elementary excitations in antiferromagnetic Heisenberg systems - Iske and Caspers **146A** (1987) 151
Helicity states, nonzero
– Nonzero helicity states in jellium in connection to the I_3^3 group. I. $S=0$ states - Glezos and Theophilou **146A** (1987) 360
Hubble parameter (see *Bianchi type II universe*) **146A** (1987) 506
Hydrodynamic interaction, many-body
– Convective motion and transfer of force by many-body hydrodynamic interaction - Felderhof and Jones **146A** (1987) 404

I_3 group (see *Jellium Hamiltonian*) **146A** (1987) 360
Inflation (see *Universe, early*) **146A** (1987) 308
Instantons (see *Convective diffusion*) **146A** (1987) 295
Interface, liquid–vapour
– Simulation of a liquid–vapour interface in an external field - Sikkenk et al. **146A** (1987) 622
Interface formation
– Boundary correlation functions and—in two-dimensional solids - Holz and Gong **146A** (1987) 255
Intergalatic magnetic field (see *Bianchi type II universe*) **146A** (1987) 506
Ising model, with frustration
– Ising model with frustration on a three-dimensional lattice - Horiguchi **146A** (1987) 613

Jellium Hamiltonian
– Nonzero helicity states in jellium in connection to the I_3^3 group. I. $S=0$ states - Glezos and Theophilou **146A** (1987) 360
Joint probability density (see *Random walks*) **146A** (1987) 641

Kramers–Chandrasekhar equation
– Multiple time scales analysis for the— - Wycoff and Balazs **146A** (1987) 175
– Multiple time scales analysis for the—with a weak magnetic field - Wycoff and Balazs **146A** (1987) 201

Landau damping (see *Fermi systems, extended*) **146A** (1987) 282
Land/water structure (see *Heisenberg systems, antiferromagnetic*) **146A** (1987) 151
Lennard-Jones fluid
– Transport coefficients of the—: analysis of molecular dynamics data - Heyes **146A** (1987) 341
Linear system
– Separation of fast and slow variables for a—with time-dependent coefficients - Wycoff and Balazs **146A** (1987) 242
Liquid–vapour interface
– Simulation of a—in an external field - Sikkenk et al. **146A** (1987) 622
Long-time tails (see *Convective diffusion*) **146A** (1987) 295

Macro-ions
– Steady state viscosity coefficients of charged colloidal systems - Dhont **146A** (1987) 541
Magnetic field, weak (see *Kramers–Chandrasekhar equation*) **146A** (1987) 201
Markov processes, non-
– The fluctuation–dissipation theorem for non-Markov processes and their contractions: The role of the stationarity condition - Medina-Noyola and del Rio-Correa **146A** (1987) 483
Molecular dynamics (see *Lennard-Jones fluid*) **146A** (1987) 341
Multicomponent fluid
– Critical end point behaviour near and away from a tricritical point - Kumar **146A** (1987) 634
Multiple time scales method
– Multiple time scales analysis for the Kramers–Chandrasekhar equation - Wycoff and Balazs **146A** (1987) 175
– Multiple time scales analysis for the Kramers–Chandrasekhar equation with a weak magnetic field - Wycoff and Balazs **146A** (1987) 201
– Separation of fast and slow variables for a linear system by the method of multiple time scales - Wycoff and Balazs **146A** (1987) 219
– Separation of fast and slow variables for a linear system with time-dependent coefficients - Wycoff and Balazs **146A** (1987) 242
Multistable system
– Noise-induced critical behavior in a— - Bulsara et al. **146A** (1987) 126

Noise-induced critical behaviour
– Noise-induced critical behavior in a multistable system - Bulsara et al. **146A** (1987) 126
Nonlinear dynamical systems
– Influence of random initial conditions on the evolution of nonlinear systems - Frankowicz et al. **146A** (1987) 650

Onsager-type transitions (see *Ising model, with frustration*) **146A** (1987) 613
Oscillator, biased (see *Barrier, quantum mechanical*) **146A** (1987) 396
Oscillator, unbiased (see *Barrier, quantum mechanical*) **146A** (1987) 387

Paramagnetic–(anti)ferromagnetic phase transition
– Ising model with frustration on a three-dimensional lattice - Horiguchi **146A** (1987) 613
Phase relaxation (see *Thermo field dynamics*) **146A** (1987) 89
Plasma, two-dimensional
– Kinetics of a two-dimensional classical electron plasma - Lu **146A** (1987) 525
Potential, asymmetric (see *Barrier, quantum mechanical*) **146A** (1987) 375

Quantum beats (see *Spontaneous emission*) **146A** (1987) 452

Random initial conditions (see *Nonlinear dynamical systems*) **146A** (1987) 650
Random phase approximation
– Van Kampen waves in extended Fermi systems and the— - Nemes et al. **146A** (1987) 282
Random phase approximation, generalization (see *Helicity states, nonzero*) **146A** (1987) 360
Random traps
– Long-time tails and convective diffusion with— - Schotland **146A** (1987) 295
Random walks
– Joint densities for—in the plane - Weiss and Shmueli **146A** (1987) 641
Response theory, linear (see *Brownian particles, spherical*) **146A** (1987) 417
Response theory (see *Volterra equation formalism*) **146A** (1987) 319

Self-diffusion, short-time
– A simple formula for the short-time self-diffusion coefficient in concentrated suspensions - Mazur and Geigenmüller **146A** (1987) 657
Separation, fast–slow
– Separation of fast and slow variables for a linear system by the method of multiple time scales - Wycoff and Balazs **146A** (1987) 219
Separation, slow–fast
– Separation of fast and slow variables for a linear system with time-dependent coefficients - Wycoff and Balazs **146A** (1987) 242
Slow variables (see *Separation, fast–slow*) **146A** (1987) 219
Slow variables (see *Separation, slow–fast*) **146A** (1987) 242
Smoluchowski equation (see *Brownian particles, spherical*) **146A** (1987) 417
Spin excitations (see *Ferromagnet, anisotropic*) **146A** (1987) 582
Spin–phonon interactions (see *Ferromagnet, anisotropic*) **146A** (1987) 582
Spontaneous emission
– Quantum beats and superradiant effects in the—from two nonidentical atoms - Ficek et al. **146A** (1987) 452
SQUID
– Noise-induced critical behavior in a multistable system - Bulsara et al. **146A** (1987) 126
Stationarity condition (see *Markov processes, non-*) **146A** (1987) 483
Steady state viscosity (see *Colloidal systems, charged*) **146A** (1987) 541
Stochastic process (see *Markov processes, non-*) **146A** (1987) 483
Superradiance (see *Spontaneous emission*) **146A** (1987) 452
Suspensions, concentrated (see *Self-diffusion, short-time*) **146A** (1987) 657

Thermal vacuum
– Dynamical rearrangement of the—in thermo field dynamics - Arimitsu et al. **146A** (1987) 433
Thermo field dynamics
– Thermo field dynamical approach to optical dephasing - Ban and Arimitsu **146A** (1987) 89
– Dynamical rearrangement of the thermal vacuum in— - Arimitsu et al. **146A** (1987) 433

Three-dimensional lattice
– Ising model with frustration on a— - Horiguchi **146A** (1987) 613
Transport coefficients (see *Lennard-Jones fluid*) **146A** (1987) 341
Tricritical point (see *Multicomponent fluid*) **146A** (1987) 634
Tunnelling, dissipative (see *Barrier, quantum mechanical*) **146A** (1987) 387
Tunnelling, dissipative (see *Barrier, quantum mechanical*) **146A** (1987) 396
Tunnelling (see *Barrier, quantum mechanical*) **146A** (1987) 375
Two-dimensional electron systems
– Kinetics of a two-dimensional classical electron plasma - Lu **146A** (1987) 525
Two-dimensional solids
– Boundary correlation functions and interface formation in— - Holz and Gong **146A** (1987) 255
Two-level atoms, nonidentical
– Quantum beats and superradiant effects in the spontaneous emission from two nonidentical atoms - Ficek et al. **146A** (1987) 452

Universe, early
– The effect of a positive cosmological constant in the early universe - Barrabès and van Leeuwen **146A** (1987) 308

Van Kampen waves
– —in extended Fermi systems and the random phase approximation - Nemes et al. **146A** (1987) 282
Viscosity, frequency-dependent (see *Brownian particles, spherical*) **146A** (1987) 417
Viscous universes (see *Bianchi type II universe*) **146A** (1987) 506
Vlasov equation, linearized (see *Random phase approximation*) **146A** (1987) 282
Vlasov–Landau equation (see *Two-dimensional electron systems*) **146A** (1987) 525
Volterra equation formalism
– —for response theory - Yu **146A** (1987) 319
